

JACOB FARROW

Software Engineer

(208) 948-7626

Rexburg, ID | jacob-farrow@outlook.com | github.com/JacobFarrow

C#/.NET developer and Computer Science student (BYU-Idaho) with hands-on experience across backend APIs (ASP.NET Core), full-stack web (React/TypeScript), and mobile (.NET MAUI). Currently support technology infrastructure for a 25-building, 21,000-person campus while building independent projects in API design and authentication.

PROFESSIONAL EXPERIENCE

Classroom Technology Technician | Brigham Young University-Idaho | Rexburg, ID

June 2025 - Present

- Resolve an average of 50 IT tickets per week with same-day turnaround, supporting technology across 25 buildings serving 20,000+ students and 1,000 faculty.
- Diagnose recurring system failures through root-cause analysis, distinguishing software bugs from hardware faults to implement long-term fixes instead of repeat patches.
- Triage and prioritize critical outages using an agile approach to ticket resolution, minimizing disruption to faculty and students.

Assistive Technology Technician | Northamptonshire County Council | Northampton, England

March 2024 - March 2025

- Programmed and configured 100+ assistive technology units per week for vulnerable service users, helping cut hospital time roughly in half by enabling safe, independent living at home.
- Partnered with a 2-person development team to improve software reliability and the day-to-day experience of the assistive technology platform.
- Delivered Tier-2 technical support, diagnosing software/hardware integration issues and translating technical requirements for non-technical clients and caregivers.

Full-Time Volunteer & Team Lead | The Church of Jesus Christ of Latter-day Saints

2022 - 2024

- Led daily outreach and public-speaking sessions to engage community members, strengthening communication skills in a high-pressure, full-time environment.
- Directed regional workflows and logistics for a team of volunteers, coordinating schedules and priorities to keep the group productive and aligned on goals.

PROJECTS

TaskPortal — C#, ASP.NET Core 8, Entity Framework Core, React, TypeScript, JWT

github.com/JacobFarrow

- Built a full-stack task/project management app with an ASP.NET Core Web API backend and a React + TypeScript frontend, including JWT authentication and user-scoped data isolation.
- Implemented a drag-and-drop Kanban board across multiple projects with task priority levels, due dates, and overdue-task highlighting; documented the API with Swagger.

FlashCardApp — C#, .NET MAUI, SQLite

github.com/JacobFarrow

- Developed a cross-platform mobile flashcard app in .NET MAUI with local SQLite persistence, letting users create, edit, and organize custom study sets.
- Built a quiz mode with answer reveal and score tracking to reinforce active recall.

Password Manager — Python, Tkinter

github.com/JacobFarrow

- Built a desktop password manager with a Python GUI that encrypts stored credentials at rest to protect user data.

EDUCATION

Bachelor of Science in Computer Science | Brigham Young University-Idaho | Rexburg, ID

Expected December 2027

Emphasis: Software Engineering / Cyber Security

SKILLS

Languages: C#, Python, SQL, TypeScript

Frameworks & Libraries: ASP.NET Core, .NET MAUI, Entity Framework Core, React

Tools & Platforms: Git, VS Code, Rider, SQLite, Swagger, JWT/OAuth basics

Concepts: Object-Oriented Design, RESTful APIs, Agile/Scrum
